## About CISSP

The Certified Information Systems Security Professional (CISSP) is the most globally recognized certification in the information security market. CISSP validates an information security professional's deep technical and managerial knowledge and experience to effectively design, engineer, and manage the overall security posture of an organization.

The broad spectrum of topics included in the CISSP Common Body of Knowledge (CBK<sup>®</sup>) ensure its relevancy across all disciplines in the field of information security. Successful candidates are competent in the following eight domains:

- Security and Risk Management
- Asset Security
- Security Architecture and Engineering
- Communication and Network Security
- Identity and Access Management (IAM)
- Security Assessment and Testing
- Security Operations
- Software Development Security

## Experience Requirements

Candidates must have a minimum of five years cumulative paid work experience in two or more of the eight domains of the CISSP CBK. Earning a four year college degree or regional equivalent or an additional credential from the (ISC)<sup>2</sup> approved list will satisfy one year of the required experience. Education credit will only satisfy one year of experience.

A candidate that doesn't have the required experience to become a CISSP may become an Associate of (ISC)<sup>2</sup> by successfully passing the CISSP examination. The Associate of (ISC)<sup>2</sup> will then have six years to earn the five years required experience. You can learn more about CISSP experience requirements and how to account for part-time work and internships at [www.isc2.org/Certifications/CISSP/experience-requirements](http://www.isc2.org/Certifications/CISSP/experience-requirements).

# CISSP CAT Examination Information

The CISSP exam uses Computerized Adaptive Testing (CAT) for all English exams. CISSP exams in all other languages are administered as linear, fixed-form exams. You can learn more about CISSP CAT at [www.isc2.org/certifications/CISSP-CAT](http://www.isc2.org/certifications/CISSP-CAT).
